

EEGS Going to the NGWA Groundwater Summit

As most of you know, the National Ground Water Association hosted a conference on Deep Groundwater and Groundwater Geophysics that was collocated at SAGEEP 2017 last March. The joint meeting concept proved to be very popular and successful. Based on this success, and to keep the spirit of cooperation growing, EEGS will be sponsoring a session of invited hydrogeophysics papers from SAGEEP 2017 at the NGWA Groundwater Summit this December in Nashville.

NGWA will also be hosting Groundwater Week, formerly known as the Groundwater Expo, December 5-7 at the same venue. Summit attendees get free admission to Groundwater Week. Ask anyone who has attended Groundwater Week: It's a big event with workshops, activity areas, outdoor demonstrations, field trips, and short courses on a wide variety of topics, including drilling, well maintenance, pump selection and maintenance, hydrogeology, water supply and environmental site characterization and remediation. It's a great place to learn something new and meet a few new friends from other parts of the groundwater industry. The exhibit hall is huge and filled with the latest in drill rigs, pumps, and environmental instruments. If you have ever wanted to learn more about the groundwater supply industry, this is the place.

Please consider coming to Nashville in December for some good music, good times, and good information. EEGS will be there, why not you? Click on these links to learn about the Summit <http://groundwatersummit.com/> or the Groundwater Week <http://www.groundwaterweek.com/>.
